### ABOUT ME

I am a junior software engineer with a passion for doing new team projects for technology development. I am able to carry out scalable and modularized projects to build in teams. I consider myself a proactive person, I have initiative, I always look a little beyond the tasks assigned to me, looking for opportunities, proposing creative ideas.

### PROFESSIONAL EXPERIENCE

#### Thinkion

**Technical support - Full-time | July 2021 - December 2021.**

I specialized in Customer Solutions working remotely as a technician giving solutions to customers by call or chat in real time.

### ACADEMIC EXPERIENCE

#### Protocol Moon

**Final project Henry Bootcamp | march 2022.**

Social media project for designers where they can create a portfolio and connect with potential buyers. Application development in React Native with CSS styles. Back developed in Node with Express implementing TypeScript. database in PostgreSQL and Sequelize.

#### Video games app

**Individual project Henry Bootcamp | february 2022.**

Development of a SPA using React for the Front End, and Redux as stage management. The components were developed with CSS without the use of external libraries. It consumes data from an API through a Back End developed in Node.js using Express, adding new functionalities to the original API.
